[An EU Strategy on adaptation to climate change - Strategy now available for download](#)

The Commission adopted an EU Strategy on Adaptation to Climate Change in April 2013 (Launch event - 29 April). By complementing the activities of its Member States, the strategy supports action by promoting greater coordination and information-sharing between Member States, and by ensuring that adaptation considerations are addressed in all relevant EU policies.

[Adaptation in Europe in practice: how do they do it? \(CIRCLE-2 Session at ECCA\)– Presentation now available](#)

During this CIRCLE-2 session project leaders of six bold, innovative and inspiring projects explained how they managed to implement the measures. Learn how projects managed to inspire individual households to contribute time and money in the construction of adaptation measures, how no-regret measures are taken that immediately yield positive results in the current situation and how areas are transformed in climate proof, high-quality surroundings.

[Uncertainties in decision-making processes: Will guidelines help do the trick? \(CIRCLE-2 Session at ECCA\)– Outcomes now available](#)

This CIRCLE-2 Joint Initiative on Climate Uncertainties' science-practice session was dedicated to the presentation and discussion of a draft version of the 'Guide', under development, on uncertainty in adaptation decision-making supported by practical case-study examples where dealing with uncertainties was successfully accounted for (or identified but failed). During this session participants were also asked how they deal with these uncertainties so as to inform the development of the publication by sharing experiences, challenges and lessons learnt. This was accomplished by using the World Café methodology in four different discussion tables.

[CIRCLE-2/INFOBASE new facebook page!](#)

CIRCLE-2 created a profile on Facebook! The goal of this approach is to strength CIRCLE's role in sharing information on topics related to climate change adaptation in Europe. The page will target a broader audience allowing for the dissemination of the projects activities namely news, publications produced and contributions to the INFOBASE.
