News

[INFOBASE new promotional video!](#)

A new INFOBASE promotional video has been launched! The goal of this video is to interactively promote INFOBASE and clearly display the value of its content and the potential of the analyzed information in an interactive and quick way!

[JPI Urban Europe Pilot Call - Now open for proposals!](#)

JPI Urban Europe's Second Pilot Call is now open for proposals. Applicants are invited to form international consortia and submit pre-proposals by the 18th of September 2013. Applications for research funds should focus on high potential approaches for creating a clear European added value on urban issues.

[Solution Search: Adapting to a Changing Climate aims to identify, reward and replicate climate adaptation solutions around the world.](#)

Rare and The Nature Conservancy recently launched a contest that will award several prizes to the best solutions to climate adaptation. This first contest, sponsored by Rare and National Geographic, sought demonstrated proven solutions that benefit coastal communities and marine biodiversity. Over 100 entries were submitted from 48 different countries.

[New World Bank climate report: Turn Down the Heat: Climate Extremes, Regional Impacts, and the Case for Resilience](#)

The World Bank just released a new report that looks at the likely impacts of present day, 2°C and 4°C warming on agricultural production, water resources, coastal ecosystems and cities across Sub-Saharan Africa, South Asia and South East Asia.

[The Met Office launches Climate Service UK](#)

Building on the Met Office's expanding knowledge of climate science, ever-improving climate forecasts, and growing understanding of how climate impacts society and the environment, Climate Service UK marks a step-change in the provision of services to assess how a changing climate might affect business and society.

[New climate data visualisation tool](#)

The OECD is pleased to announce the publication of the Climate Change eXplorer tool. The objective of this data visualisation tool is to enhance transparency by bringing climate-related statistics to life and making them easier to digest.
