

# **CIRCLE-2 DESIGN Workshop**

## **“Responses to extreme water events parallel session”**

Moderator: Antonio Pulido, MICINN/Spain

Rapporteur: David Avelar, FFCUL/Portugal

CIRCLE-2 DESIGN Workshop

Date: 22<sup>nd</sup> of July, 2011

Venue: San Giovanni in Monte University Complex, Bologna, Italy

## Objectives

- ◆ Present the rationale behind the topic.
- ◆ Prepare and further elaborate CIRCLE-2 workshop on the topic early 2012;
- ◆ Scope the interest of countries to support a potential joint initiative.

◆ From Sandra Garcia presentation

2 examples: 1 in flood and another in droughts

Uncertainty was raised

Modelling

....

## The Workshop on Extreme Water-related Events

- ◆ Will be held a WS on Extreme Water-related Events in early 2012.
- ◆ A lot of topics and contacts were compiled...
- ◆ There could be some synergies with the COASTWATER Joint Call
- ◆ It could be two different calls (the extreme events concept should be differente:  
COASTWATER = extreme event = temperature  
Extreme water-related events

# Feedback

- ◆ If CIRCLE-2 goes for both calls it could be a competition for resources
  - One hypothesis could be the launch of the Calls in different phases...

## Tentative plan...

- ◆ Workshop in Feb. 2012
  - ◆ Decide if we will have a Joint Initiative on this topic or not.
- 
- Be aware of a lot of related initiatives in Europe.
