

Objectives of IS-ENES :

- Integration of the model community
- Facilitate development of models
- Prepare for high-end simulations (PRACE)
- Foster application of ESM simulations for climate change impacts (IPCC AR5)

FP7 project - 2009-2012
Coord CNRS-IPSL
18 partners
6 global climate models
7.6 M€

Infrastructure :

Models and their environment
Model data
Interface with HPC ecosystem

Users :

The ENES community
Regional climate models
Impact studies

Fully relevant to : **JPI Climate**

Moving towards decadal climate predictions & Research for climate services
