

InfoBase News

NEW INFOBASE VIDEO

Check the new [INFOBASE video](#) and share it among your network of contacts. The goal of this video is to interactively promote INFOBASE and clearly display the value of its content and the potential of the analyzed information in an interactive and quick way!

INFOBASE supports the EU adaptation strategy

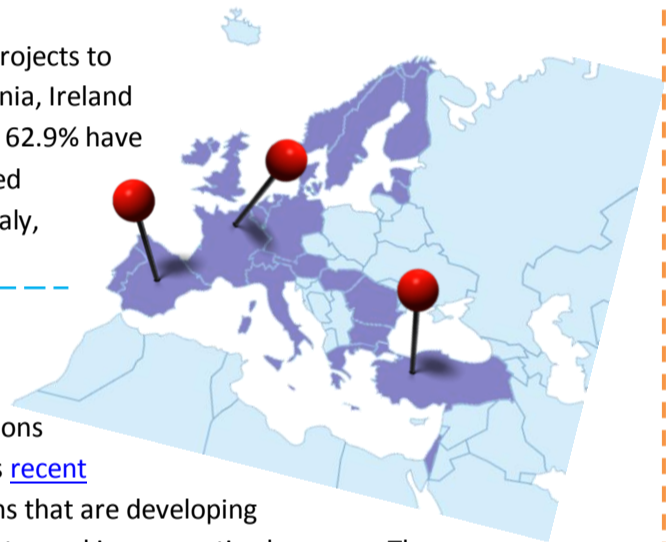

INFOBASE is mentioned as an important source of information at national and sub-national scales in the accompanying document "[Guidelines on developing adaptation strategies](#)" part of the EU climate adaptation strategy.

INFOBASE report now in Climate-ADAPT database

The recently launched [INFOBASE report](#) with preliminary findings and key questions on climate adaptation research in Europe is now available at [Climate-ADAPT database](#) in the publications and reports section. If you search the database selecting any sector or category the search results will lead you to the report.

INFOBASE Statistics

The countries with most submitted and updated projects to INFOBASE in the month of April and May was Estonia, Ireland and Spain! In April 37.1% of visitors were new and 62.9% have returned to the website. Countries that most visited INFOBASE website in April were Portugal, Spain, Italy, Belgium and Germany!

Contribution of projects to INFOBASE

You can always contribute and promote contributions in your country by disseminating INFOBASE and its [recent reports](#). Also, you can contact people or institutions that are developing national adaptation research projects in your country and in your native language. There are 3 main reasons to include your projects here: **i) it's an important tool to share knowledge on climate change adaptation that you can use in the future, ii) it's connected with the reference European platform Climate-ADAPT and iii) it will be the source of information for the upcoming CIRCLE-2 Report on "Climate Adaptation Research in a Larger Europe: an analysis at local and national scales"**.

Ultimate deadline – 21st October 2013

You can continue to submit projects until **21st October 2013**. The information that will be at INFOBASE until the ultimate deadline on the 21st October 2013 will be the information used in the analysis of the final report. All projects submitted will undergo a [QA/QC process](#) before being available on-line.

Communication

CIRCLE-2 INFOBASE Facebook Page

CIRCLE-2 created a profile on Facebook! The goal of this approach is to strength CIRCLE's role in sharing information on topics related to climate change adaptation in Europe. The page will target a broader audience allowing for the dissemination of the projects activities namely news, publications produced, contributions to the INFOBASE and the project final outcomes. Join us [here](#)!

Partnership

Connect4Climate Partnership

A new knowledge partnership with the initiative [Connect4Climate](#) (C4C) for cross promotion of contents has been initiated! Both CIRCLE-2 project contents and INFOBASE dissemination will be promoted through this partnership.
